Bengaluru, India | +91 91754 80235 | [jitenderjeet95@gmail.com](mailto:jitenderjeet95@gmail.com) | [jeet.design](http://jeet.design) | [linkedin.com/in/jitendersharmaa](https://linkedin.com/in/jitendersharmaa)

## PROFESSIONAL SUMMARY

Senior Product Designer with 7+ years of experience defining and shipping scalable fintech products at Razorpay and PayU. Experienced in leading design across complex, cross-functional teams—from setting product direction and shaping roadmaps to raising the design bar through mentorship and process. An early AI adopter who actively integrates AI into the design workflow, constantly exploring new tools and techniques to build more delightful, user-centric products faster and with greater impact.

## PROFESSIONAL EXPERIENCE

**Razorpay** | Senior Product Designer Nov 2023 – Present | Bengaluru, India

- Task Force App:** Replaced a fully manual, paper-based process with a 100% digital field operations app for Razorpay POS Engineers nationwide, cutting ticket closure time by 65% and introducing full transparency and ownership. Extended to service tickets for Android POS, QR devices, and standees.
- Catalog on POS:** Shipped Product Catalog live for 200+ merchants, contributing to Razorpay POS affordability revenue. Adapted and launched for Apple offline brand outlets.
- Downtime Dashboard:** Reduced issue isolation time by 95% (6 hours 5 minutes) and cut payment failure support tickets by 40%.
- Offer Engine for Air India:** Extended Razorpay's offer engine to handle Air India's complex, high-volume offer architecture, onboarding one of the largest enterprise clients onto the platform.
- Instant Credit on Checkout:** Designed end-to-end instant credit journey for Razorpay Checkout at a specific AOV threshold. Integrated with BharatX and CASHe.
- Shipped 20+ features across Razorpay POS App spanning multiple device form factors in a high-velocity fintech environment.
- AI & Design Engineering:** Pioneered AI-assisted design workflows at Razorpay as one of the first designers to raise a PR for frontend Dashboard work using internal/external MCPs. Top-10 finalist at Razorpay AI Hackathon; presented a working AI-powered Contact Centre demo to Co-founders and senior leadership.
- L&D:** Drove Razorpay's designer growth initiative—facilitated 15+ sessions on design craft, process, and AI workflows, helping raise the overall design quality bar across the team.

## PayU Payments | Senior Product Designer

Nov 2020 – Oct 2023 | Bengaluru, India

- **Recommendation Engine (0-1):** Designed PayU's intelligent payment recommendation engine; 80% of payments complete within 60 seconds (vs. 2-3 mins prior), drop-offs down 28%, success rate up 5%.
- **EMI Revamp:** End-to-end redesign of the EMI flow, resulting in a 25% increase in EMI success rate.
- **Offer Engine (0-1):** Designed merchant-facing offer creation product; 200+ merchants onboarded.
- **Checkout Express (0-1):** Led design for a new SMB checkout product covering address management, order tracking, user management, and payments.
- Managed design sprints across multiple concurrent products; collaborated with Product, Engineering, and Business stakeholders.

## Independent Freelance UX Designer

Feb 2020 – Nov 2020

- Designed websites for real estate developers including Omaxe, Primespace, and PS Group covering end-to-end design from research and wireframes through to final UI.
- Conducted user research in the real estate domain to inform website frameworks and information architecture for property developers.

## ADP Pvt Ltd. | Member Technical - Frontend & Design

Oct 2017 – Nov 2019 | Pune, India

- Designed and developed frontend features for 401K retirement-services products for US enterprise clients.
- Authored automation test scripts; collaborated closely with cross-functional engineering teams.

## EDUCATION

### Bachelor of Engineering in Computer Engineering

2013 – 2017

University of Pune | First Class with Distinction
